UV|Stop! 50 FOAM

SUN PROTECTION FOAM SPF 50

Comprehensive protection against UVA, UVB, UVC radiation

Description:

- Gentle sun protection foam for effective protection against UVA, UVB and UVC radiation
- High, stable protective effect in the entire UV range and throughout the entire application period (photostable)
- Dermatologically tested
- Quickly absorbed
- Extremely economical to use
- Easy to apply
- Non-greasy and non-sticky on the skin
- Does not leave any white film on the skin
- Moisturising
- With jojoba oil

How to use:

- Shake can before use
- 15 minutes before exposure to sunlight or UV rays, **apply UV-Stop 50 foam** generously and carefully
- Reapply after intensive contact with water or cleaning agents, after heavy sweating or after drying off
- Particularly high sun protection factor 50
- Sunscreen products cannot provide complete protection against UV radiation

Field of application:

- Protects the skin from intense sunlight when working and spending time outdoors
- Protects the skin when welding and working under technical UV lamps, e.g., when drying paints and printing inks, hardening of plastics etc.
- Suitable for all skin areas, including the face
- Can also be used for leisure activities and sports

Benefits for the user:

- High protective effect in the entire UV range
- UV-Stop 50 foam fulfils the current standards of the EU Commission according to 2006/647/EC for UVA protection
- Due to the high UVC protection in the commercial sector, it is very well suited for use with technical UV lamps and welding
- With moisturising ingredients
- The gentle, soft foam is rapidly absorbed and can be spread easily and evenly
- Particularly high user acceptance
