The Workshop Profi Concept

Azett GmbH & Co. KG in Ungerhausen im Allgäu has been working on the subjects of cleanliness, hygiene and hand cleansing since 1840.

The **Azett Workshop Profi Concept** gives you a perfectly matched workshop cleaning system. We achieve our complete performance for the professional workshop with just a few products according to our concept of "clear, compact, effective".

Our **Azett Workshop Profi Concept** is the perfect solution for your workshop. Our cleaning system covers both the cleaning of typical workshop oil and grease dirt on surfaces, floors and vehicles, and also the professional 4-stage skin protection concept with skin protection, skin cleaning, skin care and disinfection.

SYSTEMATICALLY CLEAN We assume responsibility for quality, health and sustainability

Quality means high-value product quality, years of experience and competent advice. With this we guarantee a perfect cleaning and hygiene concept that meets the requirements in the respective areas.

Health *"There are thousands of diseases, but only one health" (Carl Ludwig Börne)*
work-related skin diseases have been at the top of the reported occupational illnesses for years. Support the health of your skin with our professional skin protection concept.

Sustainability *"The world is changed by your example, not by your opinion" (Paulo Coelho)* –
As a company from Allgäu, nature and the environment are subjects close to our heart. All our measures, like developing highly concentrated cleaning agents, the sensitive selection of raw materials, shortest possible procurement routes, eco-packaging, and our project "From the region for the region" reflect our own demand for a "cleaner" environment.

>> WORKSHOP CLEANING & VEHICLE INTERIOR CLEANING

> HD SPEZIAL

Scope of application: Special cleaner for heavy contamination in the workshop, private and commercial vehicle sector. Cleans quickly, effortlessly and gently at the same time. Universally usable as HP cleaner, spray cleaner, ultrasonic cleaner, fuel pump cleaner and engine cleaner.
